PROFESSIONAL SUMMARY

Software Developer (B.Tech in Computer Engineering, 2026) with practical, project-based experience across the software development lifecycle in both Java and Python. Built **InventoryX**, a full-stack inventory management system in Java and Spring Boot with JWT security, Spring Data JPA/Hibernate, MySQL and React.js, covering **7 modules** and **3 user roles**. Also built **AI Tutor**, a Python FastAPI application integrating the Groq LLM API with persistent, session-based conversation history. Solid fundamentals in Object-Oriented Programming, Data Structures and Algorithms (100+ problems solved), relational database design, RESTful API architecture, and layered application design (Controller-Service-Repository-DTO). Seeking Software Developer, Full Stack Developer, or SDE-1 roles in Pune or remote India.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML5, CSS3

Backend: Java: Spring Boot, Spring MVC, Spring Security, JWT, Spring Data JPA, Hibernate, JDBC, Maven | Python: FastAPI, RESTful APIs

Frontend: React.js, JSX, Bootstrap

Databases: MySQL, SQLite

Tools: Git, GitHub, Postman, IntelliJ IDEA, Eclipse, VS Code

Core Concepts: OOP, Data Structures and Algorithms, Java Collections Framework, Exception Handling, Input Validation, Layered Architecture (Controller-Service-Repository-DTO), REST API Design, Authentication and Authorization, Role-Based Access Control (RBAC)

PROJECTS

InventoryX - Enterprise Inventory Management System

Java, Spring Boot, Spring Security, JWT, Spring Data JPA, Hibernate, MySQL, React.js, REST APIs, Maven, Postman | github.com/Mamlesh45/InventoryX

- Developed a full-stack inventory system with **7 modules**: Product, Category, Supplier, Warehouse, Inventory, Order and User Management.
- Secured REST APIs with **JWT login** and **Role-Based Access Control** (Spring Security) so each of 3 roles (Admin, Manager, Employee) can access only what it is allowed to.
- Modelled entity relationships with Spring Data JPA and Hibernate; kept API responses separate from database entities using DTOs in a Controller-Service-Repository structure.
- Implemented global exception handling, input validation and pagination/search/filtering on list endpoints for consistent, efficient API responses.
- Tested REST endpoints with Postman; version-controlled the project with Git and GitHub.

AI Tutor Application

Python, FastAPI, Groq API, SQLite, Jinja Templates, HTML, JavaScript | github.com/Mamlesh45/mamlesh-ai-tutor

- Designed and built an AI tutoring assistant ("Buddy") using FastAPI, delivering context-aware answers to user questions through the Groq LLM API.
- Implemented session-based conversation handling, persisting user interactions and learning history in SQLite across sessions.
- Built a server-rendered frontend with Jinja templates, HTML, CSS and JavaScript for a chat-style tutoring interface.
- Structured the codebase with a clear separation between application logic, templates and static assets; shared with fellow students who used it for learning.

EDUCATION

Bachelor of Technology in Computer Engineering (CGPA: 6.76)	2022 - 2026
Aditya Engineering College, Beed (DBATU)	
Higher Secondary Certificate (12th) - 66.83% Degloor College, Degloor	2021 - 2022
Secondary School Certificate (10th) - 76.40% Sadhana High School, Degloor	2019 - 2020

CERTIFICATIONS

- Data Structures and Algorithms in Java** - Apna College (2024): solved 100+ coding problems.
- LeetCode 50 Days Badge** - awarded for coding on 50 days.
- Full Stack Java** (Java, Spring Boot, JavaScript and React) - Udemy, StudyEasy Organization (June 2025).
